

Streamline the Production of Complex Documents

Banks are drowning in documentation generated by a variety of industry challenges, including regulatory changes and automation of the trading lifecycle, on top of 'business as usual' processes.

The regulatory environment is more complex than ever, but high-touch, client-facing activities including contract negotiations and regulatory change management are still largely completed by hand. This is an incredibly **time-consuming**, **costly**, and **outdated** approach which also increases **operational risk** through version control issues and human error.

By using manual processes to manage and update key documents, banks are also unable to access **valuable data** locked in PDF files, scans of annotated agreements, and stacks of paper documents.

OPAL CAN HELP

Opal is a modern, easy-to-use software platform that streamlines the production of complex documents. The platform integrates with your existing applications and workflows to automate the construction of detailed, richly-styled documents built from templates created in Microsoft Word.

Opal supports any business process, from client outreach to pre-and post-trade documentation to contract repapering, and more.

USE CASES: Opal solves a variety of business challenges across a wide range of business functions and scenarios. Whether your team is struggling to manage the documentation process around OTC confirmations, Volcker trading mandates, structured notes creation, LIBOR, Initial Margin or other repapering exercises, contract negotiations and more, Opal can help.

To download copies of our use cases, visit www.voxfp.com/products.

HOW IT WORKS

KEY FEATURES
